Intuitive Machines Lunar Operations Center & HQ

About Burns & McDonnell

Burns & McDonnell is a family of companies bringing together an unmatched team of 14,500 engineers, construction and craft professionals, architects, and more to design and build our critical infrastructure. With an integrated construction and design mindset, we offer full-service capabilities from a 100% employee-owned team.

Project

Burns & McDonnell designed, engineered, and built the Intuitive Machine Lunar Operation Center and Headquarters at the Houston Spaceport. This 125,000 sq. ft. state-of-the-art lunar production facility houses advanced manufacturing and production spaces, 3D printing areas, machine shops, research and development laboratories, clean rooms, and large-scale spacecraft assembly areas. Unique to the facility are mission control rooms to track and manage lunar missions, and a propulsion test facility to assess lunar lander engine capabilities. The space also includes offices, meeting areas, conference rooms and other amenities for both Intuitive Machines and its partners/tenants. Intuitive Machines holds several NASA contracts and has a goal of being the first private company in history to land on the moon.

Recently, Intuitive Machines accomplished that goal during its IM-1 Mission when the company's Odysseus Nova-C lunar lander became the United States' first lunar landing in over 50 years.

Visit the Burns & McDonnell Website for more information.
